.NET AutoCAD.NET is a plugin framework written in Visual Basic.NET (VB.NET) that runs on Windows, Linux and Macintosh platforms. It was the official API for use in third-party AutoCAD applications. Support for VB.NET, which was developed with Microsoft Visual Studio, was dropped in version 2018 of AutoCAD. The only current Autodesk supported AutoCAD application that uses the.NET API is AutoCAD Architecture. The.NET API was based on the then new.NET framework version 2.0. The AutoLISP API was a continuation of the Microsoft ActiveX framework and could be used on Windows, Linux and Macintosh platforms. Visual LISP Visual LISP is an extension language used in the AutoCAD applications, allowing users to automate many steps in the drawing process. While Visual LISP can be used to program all parts of AutoCAD, it has become an important part of AutoCAD programming since version 2005. Visual LISP was designed by VBA2LISP and was maintained by Autodesk's Software Creations group until the 2015 release of AutoCAD. Extensions written in Visual LISP can be called from AutoCAD. Visual LISP can also call AutoCAD. Visual LISP is open source and can be used by anyone. AutoCAD's ObjectARX class library AutoCAD's ObjectARX class library is an object-oriented framework (OOP) for the.NET platform. It provides classes that can be used to create graphical, behavioral, and process automation objects. The AutoCAD ActiveX Library is an integrated set of object-oriented classes for developing applications using Visual Basic or Visual C++ to automate AutoCAD drawings. Autodesk Exchange Apps The exchange format (DXF) file format is used by AutoCAD, and many third party software packages, to exchange drawing information.
