What's New in the?

Markup Assist makes it easy to create edits that are reflected in your drawing. For example, markup assist is available to annotate drawings with information like project status, project milestones, and comments. This information can be hidden or shown, and an annotator can create design elements such as arrows to connect annotation points and clickable hyperlinks for text. (video: 2:43 min.) Enhanced DTP Capabilities: Create interactive documents with HTML5. Pages can be constructed using a JavaScript app using the Drawio tool for building interactive PDFs. Exports to interactive PDFs, DWG, and DWF files from RIBs. Create interactivity including using touch, gestures, audio, and cameras, as well as map interactivity. New XML Viewer: Create your own XML files and view them with a simple point-and-click user interface. Open up existing files with metadata, navigate to different elements and operations, and add comments. (video: 1:15 min.) Show me the inside: 3D View Preview: The inside of 3D objects can be shown in the AutoCAD 3D view and the associated Draftsight 3D view. You can also see the inside of 2D surfaces that are rendered in 3D. Built-in Replace: Replace a single object in a drawing by highlighting the object and click the Replace button on the ribbon. This replaces the current object with a copy of the one that you highlighted. (video: 1:35 min.) See what's new on the AutoCAD 2023 website.
