What's New In?

1.5 million+ installs across 3-5 countries (incl. USA, Canada, Italy, Japan, Australia, Spain, Netherlands) Free version is fully functioning (you can't add any categories, if you try to add expenses you will get a "xxx has not been added" error, you can't edit expenses either) Newest update includes "Account Control" feature, using this feature you can block an app from using your account for 1, 3 or 15 months! Every month and every day you can check how much money you are spending and how much money you make. You can also filter your data by categories, see your expenses history and see total expenses (incl. categories) summary. Save your ideas and categories to export to your spreadsheet. When you don't add your transactions or categories in a month or a day the previous ones are still there. You can also add notes and transactions to your categories so that they are easy to filter later. See what you bought and how much it was in real prices, or even how much dough you spent on your daily coffee. This tool helps you to create, save and import transactions with notes. You can quickly add categories and set a price to every category with image, description and notes.
