Well now there is! Enter FileExplorerGallery, an app that brings a fresh approach by displaying all the images in a folder as soon as you press the dedicated hotkey. Browse all the folder graphics (and there are a lot of them!) Basically, you do not need to launch an app every time you want to enjoy a picture from your PC. You can simply explore a folder, then press the corresponding hotkey. The default hotkey is F12, but you can replace it with one of your choosing. All the detected images are neatly shown in a full-screen window and you can select the one you want to focus on. As soon as you found the picture you want to view, you can double-click it and zoom it in; the mouse wheel does the same thing. You can revert to the original size with a simple mouse right-click. However, you need to keep in mind that the app specializes in showing the pics, not editing them. For instance, you can set it to sort by date or by event or you can even set it to group by album. I especially like the fact that you can use the filters to organize the photos and I like the fact that it also lets you resize photos. The main issue I have with the app is that when you add a photo to the app it only shows the direct selection, so you can't scroll down and see the photos before it. Other than that, this app is the best app I have found so far to organize my photos. Pros: 1. The app lets you organize your photos by event, date, where you were when you took a photo, or even if you tagged the photo. 2. The filters allow you to make editing on the photos easier, and you can even use the app to take photos. 3. You can select a portion of a photo and remove the photo to the right of it. 4. You can even remove photos from the app from right to left. 5. The app has a text editor that lets you use any text from anywhere to edit your pictures. 6. The app is free, but you can get add-ons. 7. The app saves your place in the app so when you start it up you don't have to go back to the beginning to see all your photos. 8. The app has a search function that helps you find photos. 9. The app has a sorting option, so you can sort through your photos by date, by event, or by the album they belong to. 10. The app has a photo browser that helps you sort pictures. 11 09e8f5149f
