Very easy to do! by alexander 3.6 / 5 Excellent, but after loading the same image twice the next time you see it in your list you'll get just the first image with a black background, then after each refresh it's back to the first image, no explanation on your site what happens. by someguy 3.0 / 5 Other than the widget design, this clock is great. I used it to make a live clock on my home page. I created a website for a friend and used this to add the clock to the page. The images you use as the clock are really cool and fun to look at, and the functionality works great. Only problem I have is that when I use it, it changes the color of all the fonts on my website. I don't like that. by something 4.8 / 5 I love this widget. I'm going to be using it on my web site. by user 4.5 / 5 This clock is superb.
