

February 1, 2018 - We installed Statistica 13.3.1. for evaluation test . After installation, we registered the serial number, product key, but could not activate. We tried to find a solution, but we couldn't. We also tried to install the previous version 13.2 as a backup. When we upgraded to the new version, we were unable to activate it. We downloaded the latest version and received a notification. But when we activated the license later, we got an error. We checked the license file and it was signed. We reinstalled and installed. We tried to activate the license later, but got an error.
