KEYMACRO lets you easily change the look of files and folders. HOW TO USE: Select a look or category of looks (Fairytale, Tech, Dictation, Cloudy) to select the look that you want. The theme color is also available. If you like the look, simply use the "RUN" key and your theme will take over instantly. Keymacro will make icons like: Screen Saver Desktop Screen Desktop Screensaver Desktop Screen Saver Desktop Screen Saver Screensaver Desktop Screensaver Themes

Keymacro also allows you to change the background image of the screen. Set your own, or use a predefined "set" you made yourself. You can change the "header" of the screen, the "icons" and even the "picture" of the screensaver. Feature HOW TO USE: Select a look or category of looks (Fairytale, Tech, Dictation, Cloudy) to select the look that you want. The theme color is also available. If you like the look, simply use the "RUN" key and your theme will take over instantly. It's easy to create your own themes, but if you're unsure, simply select the "Fairytale" theme and it will open the "Fun Stuff" window. If you like the look, simply click on the "Save" button to save your settings and then use the "RUN" key to change the theme. Keymacro supports real skins and icon sets for each "look". Keymacro automatically creates and stores new themes for you to use as needed. Simply select a theme, add your own icon set, images and save the theme settings. All you need to do is add

the new theme to your Keymacro settings and use the "RUN" key to apply the new theme to any or all of the files and folders you have. All skin themes are created with care and attention to detail. Each theme is built from the very best that Skin Icons has to offer. WHAT'S NEW: - Fix: iPhone theme looks different on iPad! - Fix: Incorrect skin tone for default iPhone theme. - Fix: Fix a crash when adding a second iPhone theme - Fix: Color changed when trying to change
