CHAPTER 3 SOLUTION EXERCISE FOR CHAPTER 3 EXERCISE # 1 Recall the following three-digit numbers as well as the powers of three that are needed to reach them. $1.24 \cdot 0.98 \cdot 0.324$ Write the reciprocal, quotient and product of each of them. $1.24/1.024 = x$ $1.024 \cdot 1.024 = x$ $0.98/12.84 = y$ $3.84 \cdot y/12.84 = z$ $8.56: 6 \times 3 = 18$ $3 \times 6 = 18$ $1.98/(7/8) = z$ $1.98 \cdot 7/7.98 = z$ $0.97 \cdot 1.024/12.84 = z$ $2.16 \cdot 8/8.16 = z$ $0.875 \cdot 17/17 = z$ 0.5 Note that these numbers are of different lengths. Don't be misled by this, as we will need to combine them to find the result. $1.24/1.024 + x/1.024 + y/12.84 + z/12.84$. $1.24/12.84 = 2.11$ $7/7.98 = 2.79$ $168/168 = 8$ $3.84 + 2.16 + 0.875 = 8.81$ The numbers have now been combined and you can easily find z . $1.24/1.024 + 3.84 + 0.875 = 8.81$ $3.84 + 0.875 = 8.81$ $z = 8.56$ Note that we have increased the size of our problem from three digits to four. CHAPTER 2 SOLUTION EXERCISE FOR CHAPTER 2 EXERCISE #1 In this exercise you will find the following numbers or you will be given others that are missing two digits and you will be asked to: $\square \dots \dots \square \dots$ CHAPTER 2 SOLUTION EXERCISE FOR CHAPTER 2 EXERCISE #2 Solve the following problems on a separate sheet of paper. Tried and true introduction to the topics covered in this course! Your answers will be checked. If you make any mistakes, the amount of time you spend on this handout will not be refunded. Practice exercise 1a. CHAPTER 7 SOLUTION EXERCISE FOR CHAPTER 7 EXERCISE #2 Solve the following problems on a separate sheet of paper. Tried and true introduction to the topics covered in this course! Your answers will be checked. If you make any mistakes 82138339de
