Digital Clock Description: -- Can estimate the time to within 5 minutes. -- Functions as a clock estimator. -- Shows the time as well as the current day of the week in the title bar. -- Has three different types of date and time displays: Day, Month and Year. -- Shows a calendar at the bottom of the window. -- Shows the current date, month and day, and the current time in the lower-left corner of the window. -- Shows the time in

What's New in the?

Wondershare Digital Clock is an easy-to-use utility to read your time easily on your desktop. It displays the current time, date and remaining countdown time till New Year's Eve. There are also several settings provided by the application to change the time format, sound volume and repeat rate, as well as set up an alarm to notify you when the time is set. You can also set your Computer's uptime and New Year event countdown to specific dates. What's New: * Windows 7 support M As M days, hours, minutes and seconds. This is a date and time for future events. By entering a future date (such as a date in the future, in MM/DD/YYYY format), you can customize when you want the alarm to go off. Please note, if the calendar you use is a free one, the alarm can only be set from the month and date of your choice, not from the day of that month. This application will be very helpful for those working in the field of tourism. Tourists with a lot of holidays and working a lot of hours tend to get nervous when they wake up in the morning and realize that they are late for the meeting or event. To save a lot of time, they use this application to set up alarm to remind them of important dates in their trip. Features: * This is a kind of future date. * You can set the alarm to go off on the first day of every month, every week, every day and every hour. * You can select the month and year of the future date. * You can choose the days of the week to check the future time. * You can set the number of hours the alarm will go off. * You can select the sound of the alarm. * You can set the volume of the alarm. * You can set the repeat rate of the alarm. * You can create multiple alarms. * You can set the alarm to go off when you shut down your PC. * You can save your customized settings in a file and restore them later. * You can view your alarm in the calendar of Windows. * You can set your computer's uptime and New Year countdown to specific dates. * You can set up a countdown timer. * You can choose the time format. * You can choose the date format. * You can change the font. * You can change the background color. * You can reset to the default settings. * You can check out the Support section for more details. P As P days, hours, minutes and seconds. This is a date and time for future events. This application will be very helpful for those working in the field of tourism. Tourists with
