For reasons I don't need I don't understand that my xara Designer pro v.18 stopped working.Humble Bundle told me that the serial numbers are expiring in this I don't think it's because of me, it's because I made some changes in ... I want to remove So I don't I can't do anything in (I tried doing it with a delete utility like this) because So I can't run ... I can only run
Otherwise, I can't delete the program folder and I can't uninstall the program. I want the program not to run on my friends' computers and my wife doesn't know about it.
