System Requirements:

If you plan on playing a lot of PvP, I recommend going with a really fast PC with a good CPU and a reasonably large amount of RAM, or if you're not too picky you can go with a standard PC, but if you're concerned with your frames per second it's probably a good idea to get one with a better video card (either an ATI or nvidia). Important: All of the maps in this game are designed to be played online with 2 to 5 players. Each team is responsible for their own kill/death ratio when playing
