Leveraging Evidence-Based Medicine - Lancet Oncology Summary In this editorial, we discuss the essential role of randomized controlled trials in the evaluation of cancer prevention and therapeutics. We review examples of where randomized controlled trials have resulted in changes in clinical practice. We also discuss where current cancer prevention and therapeutics trials are leading us towards cures, and we make suggestions for where the evidence may be lacking and where additional trials may help to fill the gaps. Publication History View the full text of the editorial to see where it originally appeared and how many times it has been published. Please note:
