Reticulodendritic synapses are widely dispersed on both sides of midline structures in the retina of the hibernator, *Sorex araneus*. We used the horseradish peroxidase technique to visualize neurotransmitter-releasing reticulodendrites in the retina of the hibernating ground squirrel, *Sorex araneus*. In the supraoptic nucleus, reticulodendritic synapses are found on one side of reticulohypophysial cells. On the opposite side, the hypothalamic periventricular region may serve as a commissural point for reticulodendritic synapses on the neighbouring reticulohypophysial cells. In the paraventricular nuclear region, the majority of the reticulodendritic synapses may be found around the periventricular hypothalamic vasopressin magnocellular clusters. On the opposite side of the fiber tracks, reticulodendritic synapses are seen in periventricular neurons and fibers of the fasciculus galactocellulare. Reticulodendrites were almost always found on the other side of Müller cells. Müller cells appear to have dual roles in the retinal circuitry. In the optic nerve head, Müller cells may serve as a nonglial limiting retinal axon to the lamina marginalis of the optic nerve head. falta en la ciudad y que es responsable

What's new:

_. People seemed to be around _only_ in the summer, almost like it was a relic of 1964, a sort of 1956 period carryover, nothing in the way of chips or candy bars or cigarettes and definitely no recognizably licorice-flavored gum. "You want to get _high_?" I asked Frank. His family was from Outer Mongolia and he knew all about the weed in Tibet, and he was pretty confident about the effects of a small, kind of chunk-like piece of spliff floating through the air to a smoker's brain. "I just want to watch the guys play some ball. Me and the Duke will be at the back of the pavilion. You come on, bring me some, I'm right next to the bathrooms." But we sat at the back because my father had been to a ball game once before, the Dodgers game of his first season as a pro. He was a kid in the stands at Ebbets Field in Brooklyn—he liked the hard shove of the outfield grass against his bare toes—and he dragged me with him to the ball park on his big brother's day off. Big Roy drew a dollar per week from the team and for the privilege of sitting in the stands, whoopin it up with the fans in the '27 New York Yankees _and_ Dodgers uniforms, you came home with a string of pennies hanging from your dog's collar. Frank excused himself from the scene and tore into a cigarette. I was worried he was going to smoke his lungs up by the time we left. I took my father's old hat off his head—there was a spring in the crown and I had to choke down a laugh and a curse to open it—and sniffed the inside of it. I could smell the Brookside and the Woollies and the chocolate and coffee in there. Even the sweat of the shirt that my father wore every day, the one he'd chosen that day, _the one_ because it had small green insects stitched in the seat and down the front. Sniffing inside someone's hat is something I'd like to have at retirement. Settle down in the hole and sit by the mammoth fireplace and count the decades come and go while you have a second smoke. Frank walked up the stairs toward his young and dubious friends on the slopes of the Fairmount. The teams were changing—Princeton was uniform in blue and white
