I am a small bear, and I know what I'm talking about. AvioDev Pty Limited is an innovative developer and publisher of video games, which have gained a considerable amount of attention and recognition for their quality. Although not amongst the few well-established names in the industry, AvioDev has successfully released such games as DCS: AJS-37 Viggen, DCS: MiG-21bis, and DCS: C-101 Aviojet. These games are well known for their excellent flight modelling and have high replayability due to their unique fly-by-wire flight model and rich feature set. The AJS-37 Viggen and MiG-21bis games were recently released as official updates to their respective games. When approaching a DCS World Add-on, you should expect to see the DCS World logo above an AvioDev logo, with the AvioDev name under the DCS World logo. The exact name of the add-on will be found within the description box. The AvioDev team takes great care to integrate all new features into the game, with no intention of the game becoming bloated. As the number of primary developers for the game decreases, features added by external developers will increase. AvioDev also does not neglect to focus on the most important element of a game, gameplay. The 3 Little Bears: The AvioDev team are 3. 5 ft tall men. Abner Fox – Lead Flight Dynamics Modeler Andy Stone – Lead Navigator Addy Webb – Lead Flight Mechanics Design Philosophy: The AvioDev team’s goal is to create a non-intimidating, but professional, environment that will enable players of all skill levels to safely and easily discover the game and enjoy their flight experience. Pilot's Notes There is a text file on the AJS 37 Viggen CD-ROM disc's folder named "AJS 37 Viggen - Pilot's Notes - v1.00" that contains the following text (in ASCII format), which may be useful in understanding the model. 's Tests Audio Forager's Test Reviews Uncertainty factor really depends on the plan you are buying. There are so many plans out there, that I don't think anyone could tell you right now which is the best. You really need to try them out to find out. I may only have 20 or 30 minutes per day to play around with the software, and it does take some time to figure out. So you can spend a huge amount of time to find out the best plan for you. Some say Esoteric, Magix, Aqualung or any of the other plan I have in use. You just can't go wrong with Amazon's Prime plans. I suggest that one for sure. Rockin' the trials and having your apps and expansions local. Uncertainty factor really depends on the plan you are buying. They come at a budget price and are an excellent value for the many great shapes provided within each set. You will enjoy using them.Download the demo to check them out! They are great. But I can't actually play them. The one I got from Amazon uses a software called "Emagic Essentials" for expansion compatibility and it really doesn't support the ones I downloaded from Audiophile at all. Support is non existent. I asked Audiophile for assistance and not only did not offer any but also made a comment on my review stating that they don't accept support requests due to the fact that it's a free app. I've yet to see a response to that, perhaps they care more about their users than what anyone else will care about. Their apps are still available through their own website, and I bought the app from
