Matra 6501 here.O: What is the alternative to TypeConverter.ConvertBack()? I am receiving a BinaryObject as a return from the server with JSON.NET serialisation. The JSON.NET automatically converts a byte[] to a BinaryObject and vice versa. My problem is that when I deserialise the object to a Type it throws a NotSupportedException because it is a BinaryObject. How can I work around this to simply obtain the byte[] back? I have looked at the docs and tried TypeConverter.ConvertBack() but that gives me an InvalidCastException. This is what I want to do: TypeConverter converter = TypeDescriptor.GetConverter(format); BinaryObject obj = (BinaryObject)converter.ConvertFrom(""); And here is

4/6

the InvalidCastException: Unable to cast object of type
'System.String' to type 'System.Byte[]'. A: A solution I've
come up with is the following: TypeConverter converter
= TypeDescriptor.GetConverter(type); Object obj =
converter.ConvertFrom(""); BinaryObject binary =
(BinaryObject)obj; byte[] objAsByteArray = binary.Data; I
know it isn't elegant but it does the job at the moment.
Ask HN: What kind of startup should I start? - skc I'm a
first year programmer and my mentor is looking for
advice on what type of startup I should choose to work
on.For one, I'm a programmer so I'd
