As such, searching for media content can be a time-consuming and resource intensive process. David Cameron's search for a "grand bargain" on the economy has hit a setback after his Tory colleagues rejected a Labour proposal for an emergency budget to help business. No agreement could be reached between the two parties for the fiscal tightening, which could breach party promises to stick to the coalition's "debt brake" on borrowing to help the economy. Cameron said he would have to make the move to protect the public finances and keep his pledges in his party's election manifesto to increase taxes on the very wealthy and cut public spending. Labour's offer was made for the budget in March, but rejected by the coalition's powerful inner circle, led by senior Tory figures including lain Duncan Smith and Michael Gove. It was held up for months by cross-party discussions with the Liberal Democrats, which led to last week's agreement over business rates that Cameron had played down before. The planned budget, expected to be announced in the autumn, has come to nothing. The failure of the Conservative MPs of the People's Vote group to back a vote of no confidence in Theresa May has also been blocking progress, according to an ally of the prime minister. Responding to the fresh setback, Labour's Jonathan Reynolds said: "David Cameron's failure to a successful plan to create jobs and growth." Camer

The study, published today in Scientific Reports, found that a high-fat meal affected activation in the emotion-processing region of the brain, which is associated with eating disorders. The results suggest that eating a high-fat meal may trigger emotional and behavioral reactions that encourage us to consume more food, says senior author Gregory Kennedy, a professor of psychology at the University of Florida in Gainesville. He tells WebMD that overweight people tend to have diminished activity in a part of the brain called the amygdala, which is involved in the detection of a threat. "The amygdala, and his activated of the brain associated with emotional responses," he says. "So, for example, when we are scared, that will activate a here in the new study, he and his colleagues found that overweight people who were hungry but did not eat after eating a high-fat meal
