Q: UINavigationController not being loaded on specific pages I am doing an app where the user must either 'vote' or 'comment' on news items. When voting or commenting, I present a UINavigationController. The problem is, that when I open the specific view (like the comments page) the navigation is not loaded and the only thing I can see is the UINavigationController button on top. If I open any other view, for example the news, the navigation is shown fine. I am a very beginner, so if you could tell me what I could do to resolve this, that would be great! Here is my code: -

```
(void)tableView:(UITableView *)tableView didSelectRowAtIndexPath:(NSIndexPath *)indexPath { if (indexPath.row == 0) { initialiseViewController(newsId, kNewsViewControllerID, news); } else if (indexPath.row == 1) { initialiseViewController(advertiseViewControllerID, kAdvertiseViewControllerID, advertise); } else if (indexPath.row == 2) { initialiseViewController(imageViewControllerID, kImagesViewControllerID, images); } else if (indexPath.row == 3) { initialiseViewController(commentViewControllerID, kCommentViewControllerID, comment); } else if (indexPath.row == 4) { initialiseViewController(newsID, kNewsViewControllerID, news); } } - (void)initialiseViewController:(NSString *)newsIndex IBAction { NewsViewController *newsViewController = [[NewsViewController alloc] initWithNibName:@"NewsViewController" bundle:nil]; if (newsViewController != nil) { newsViewController.title = [self.newsTitles objectAtIndex:[newsIndex intValue]]; newsViewController.newsImage = [self.newsImageViews objectAtIndex:[newsIndex intValue]]
```
