Microsoft made a new Windows Activation page in the company official site to verify software activation. At the time of the launch of the Windows 10 version, it requires a product key to activate the Windows 10.

Q: Organizing command line interface with layout I'm trying to create a design for a command line tool, and I'm very interested in any advice on how to create a user interface which looks nice. My initial attempt was just to create a long string with ANSI escape sequences that I then print to the console, but I guess this isn't very good. Are there any good resources on creating user interfaces for console apps?

A: Here is a guideline for console apps, at least for Windows. A: There is no standard. If you need a standard, you are asking for a standard (typically, one that just everyone uses, which doesn't exist). How about just make it look good? A: Coding standards for command-line applications have been "in style" since the 80's
