Field of the Invention The present invention relates to an image formation apparatus for forming an image on a sheet of recording paper. 2. Description of the Related Art In an image formation apparatus including a printing section, a plate carrier carrying a printing plate is set in the printing section and the printing plate is pressed on an image carrier and the image carrier is rotated for exposing an image on the printing plate, thereby printing an image on a sheet of recording paper conveyed from a paper feeder. Conventionally, an image formation apparatus is known in which a cutter is provided to cut the printing plate after printing and thereafter, the cutter is moved to the printing section side of the apparatus and the printing plate is cut along a line extending from a side of the cutter to a side facing the cutter (see Japanese Patent Application Laid-open No. H5-93543). Also, in an image formation apparatus, a conveying belt is used to convey a recording paper after the printing operation. With this apparatus, even if a printing plate is cut, the cut printing plate is conveyed together e79caf774b
