Historical aspects The Avvicinamento al restauro was designed in 1997 in Rome by the architect Carla Antonelli and was realized thanks to the participation of the Delegation of the Ministry of Culture of the Republic, the Municipality of Rome, the Comune di Roma, the United States Ambassador to Italy, John D. John B. John R. Robert N. Chipman, Jean-Paul Lee, Stephen C. Lundin, StÅ©plane Walpole, Hugh Salves, Paolo Bruyn, Paul Fletcher, K. Geertz, Clifford. Characteristics The House of the Archaeological Mission is classified as monument of cultural interest on account of its size, of its use from ancient times until today, and of its historical and artistic importance. The building has been occupied for more than 2000 years and has hosted the most important works of art of Roman and classical civilization and has been largely consecrated as a museum with more than 2 million visitors in its history. It's one of the most important archaeological site in the world. The House of the Archaeological Mission is listed as a building of cultural interest under the category of Dense Urban Area (Category VIII) and by law it can't be modified, restored, built or demolished, and is protected from noisy and harmful activities. The site is located in the historical center of Rome, which is a World Heritage Site thanks to the preservation of the original urban fabric. The archaeological excavations have been conducted during the entire history of the house and have unearthed a large number of objects, ranging from the 14th century to the present. History The House of the Archaeological Mission was built in the first century AD, in the Flavian district, next to the stadium, inside the imperial palace (the Ludus Magnus). It was built for at least two reasons. Firstly, the building was needed to house the collections of the Museum. But also, the structure itself and especially the gardens, were intended to host important literary events, like literary salons, which attracted the elites of Rome. Archaeological excavation of the House of the Archaeological Mission began in 1894, under the supervision of Bernard E. Barnard E. Bernard E. Butterfield, 0cc13bf012
