London Fog is one of the most popular brands sold in boutique department stores worldwide, but especially in the UK where it is listed as one of the best-selling shoes at Selfridges. It is also sold in most major UK department stores, as well as shops in the United States, Canada, and Australia.

Design London Fog shoes are square-toed slip-ons with a plush inside. The brown suede is hardwearing, but the leather outsoles need to be replaced after a time. The current ranges include men's and women's versions. History The London Fog shoe is a direct descendant of Lucky Strike overshoes, which were the first hardwearing slip-on shoe and were introduced into the market by

George Patterson & Sons in 1938. The conception of the London Fog was one of the many accomplishments of the shoe designer Peter Lesley. Lesley was the son of Alec Lesley who designed the original Lucky Strike overshoe. In the early 2000s Lesley sold out to former store manager Michael Williams, who created the brand with former designer Caroline Thomas and later formed Billionaire Boys Club. As time passed, Lesley became increasingly resentful of the Billionaire Boys Club's (B.B.C.) lack of appreciation for his work. Eventually, his repeated demands for payment became intolerable and Lesley walked out of the
