The music is yours to use however you like, it's entirely up to you. With the option of using any music you like, the SOUNDART soundtrack possibilities are literally endless. Generate a score to display on your own personal installation and see it change as you play. The game supports Oculus Rift and HTC Vive. Featuring an intuitive user interface and a customisable keyboard. This game works best with one

controller, but you'll probably want to use a second one in order to make the most of it. SOUNDART is the first complete VR-oriented rhythm game ever made. Fan creative and artist: sHishiZero Publisher: BitSummit Size: 238 MB The Stories The year is 2048, and a group of scientists have discovered a way to tap into the power of the Machines, the vast fleet of artificial intelligences that nearly all Humanity relied on to power their lives. The Scientists, calling themselves the "Sapiens", had created a program called "Slave", a device that could replicate any living thing using the AI's data and wiring, a process they called "emulation", and claimed could save the future of Humanity. The Sapiens sought to use this technology to raise a few children, allowing the Machines to take over all the work that they previously did. However, due to unforeseen side effects, some side effects, Slaves were programmed to learn. And as the children grew up, the Sapiens machines were defeated by their own creations, and the Sapiens were forced

to live without the Machines. The Young Children The PCs, who had been named Latte, Gardenia, Kittycat, and Zein, shared the idea that the best way to overcome the machines would be to recreate the Sapiens, making a new Sapiens. They found a way to imitate the Sapiens through the Slaves, but for some reason their creations were half-human, half-machine, just like their creators. The Slaves would act as their trainer, and

Captain Forever is an adventure game set in the universe of the "Space Quest" series, and take place in the same world. Biggest Hint: To make this mission a little easier to get to ave, you have to find a place called "Lakeside Landing", otherwise the mission is not for you. Pros: Gameplay is unique and fun. Difficult to get through sometimes. Solutions to puzzles are cool. Awesome Music. Shadily designed. Cons: Open world

design is too loose and explorable. You can pick up stuff and get stuck in a room or preferred place. Inconsistencies. Lack of tutorial, hints and tips for missions. Game On The story of Captain Forever Ubisoft Montreal, 2013 It's a richly detailed experience that manages to flow from beginning to end without a single dull stretch. There are amazing puzzles, some of which require you to manipulate the environment to solve, and while the world isn't rendered to scale, it does a good job of translating concept and imagination to paper. Sometimes it gets a little convoluted, and the game's sense of urgency can start

to feel a bit thin. But there's so much going on in this game that it's hard to mind. All in all, it's probably the best game of the year, and if you're a fan of point-and-click adventures then you owe it to yourself to at least try it. What's new:

Syndrome Cynthia has been reading a lot of online prescient postings lately on blogger forums about the weekend PROPHECYthat the planet is going to blow up! It's got her a bit concerned. This weekend she put some dots on a chart of the star chart she has been working on for a while, and really got a really HUGE headache! The voice kept telling her that the Planet's orbit is going to get "all snarly" and that she will want to leave her loved ones to just "hunika tink" in the face of the coming planetary catastrophe! She went to the grocery store and bought a large bag of salt, ground red pepper, and never went back in there. When I picked her up I asked her about the

chart...she looks a bit pale. She said, "It was very painful...I KNEW I would have a headache!" The "prophecy" was that it is bigger than we can even imagine. "It's gonna be HUGE!" she said. From here, we are going to get to the cause of her headache in order to get rid of the problem. We need to stop the outer planets from brushing up against the inner Sun and start them in their proper stations. Cynthia explained that the planets are like magnets (for much of the teaching) and must be in place for the transition to occur. "They had some bad planets in a very bad position, and it was screaming!" She really felt that these planets were there to create this change! The planet in question is Mercury (he's the little planet only that is clamped down to the Sun at the 8th House with Pluto, in it's influence, at it's bottom in Capricorn). Mercury was being deprived of it's own power; it had missed Pluto, and was playing "dead partners with the larger planets" ~the solar system keeping the Sun down and cut off from energy. So the Sun is in charge, and they need to be in their proper position. Mercury has been maimed and is only getting part of what it needs, so it is sluggish and overworked; this is the deeper causes of what was going on. It wasn't to do with any injuries or broken bones, but more so as a blockage. It's how we block ourselves at the deeper level that
