It appears that the "link-only" flag gets used disproportionately often. I have a little less than a thousand rep, but I'm quite active on one of the StackExchange sites on which I have enough rep to actually moderate. I see questions that have a couple of links, but absolutely no content, and some of them are closed. Some of these posts look like they're from new users, and some are at least two years old. I can see two possibilities for why this is happening: It's happening because users aren't aware of the purpose of this flag It's happening because some moderators don't know how to correctly use this flag The former possibility is, in my opinion, a good thing: we should be helping users out, not leading them astray. The latter possibility, however, seems very, very wrong: moderators should be using their discretion to help people. I'm quite certain that the moderators I'm talking about here are not the people who write the code for our websites, so if the problem is with how the flag works, it makes me think that SE has a very clear direction for how mods should be using it, and they're ignoring it. Here's an example. This is a user who posted a question. He asked, "Could you please tell me if this code works?" There are two links to sources. One of them was to a site that told him that his question was off-topic for Stack Overflow. But, the question was definitely on-topic for Programmers. The user posted a lot more code than this, but he posted this part because it was the only code he added. The only content of the post was that he was trying to find out if some code he was trying to write was working. When the "link-only" flag was used, it was on this post, and I agree that it was appropriate. But, in this particular instance, I think the reason it was used is because the user didn't understand the purpose of the flag. The way I see it, the moderator should not have used the flag. What do you think about that? A: Seems like you're saying two things: "Link-only" questions should still not be downvoted. c6a93da74d
