Is this the newest version of Windows .The Clinical Trial of XMRV (CTXMRV) is a multi-site, double-blind, placebo-controlled trial examining the ability of a live virus vaccine to reduce risk of prostate cancer. We have already enrolled ~950 subjects at six sites (Louisville, Lexington, Denver, Tampa, San Diego, and Florida) and have received biosamples from all, except Louisville. The Louisville site, a minority-serving clinic, just opened a year ago and has produced an initial cohort of 36 subjects. Over the past few years we have learned a great deal about enrollment and retention of subjects in this trial, and we believe we can approach the science goals of this study efficiently using the Louisville site. Thus, the goal of this proposal is to develop the Louisville site to be a full-fledged clinical trial site by final year c6a93da74d
