Corporation.Q: Keyboard shortcut for backspace on full screen desktop apps? Is there a keyboard  
shortcut, or some other way, to make Emacs/C-x 2 backspace the default delete key action in a full  
screen, desktop Emacs window? I would like to use Emacs for programming (more specifically IDEs)  
because it's a pleasure to keep learning all those awesome Emacs tricks, but on the other hand I  
don't want to have to move my hands from the keyboard every time to look at the screen to hit  
backspace. I've spent time now trying to figure out whether this is possible. A: You can use C-h k b  
for backspace and C-h m for C-h m cursor-mode RET C-u C-h m switch-to-minibuffer A: To insert the  
backspace character, you need to type Control+H, delete and then Control+H. Emacs opens a  
minibuffer with a few options: Delete forwards, or back. Back Backward, delete then c6a93da74d
