# Dongle Emulator Eplan P8 2.2 18

[\*\*Download\*\*](#)

---

The EPLAN Platform integrates all of the components used to manage a building project at one location, especially in energy-consuming processes, such as: EPLAN Visualis EPLAN PTC EPLAN Integrated Planning EPLAN API EPLAN Engage EPLAN Fault Analyst EPLAN Building Plan EPLAN Documentation The Siemens EPLAN software guarantees you have a high-quality, reliable, and efficient data foundation for engineering, planning, building automation, process and cost management. With just one click you can obtain documentation that guarantees you a consistent view of the project and can be used in a process- and task-oriented manner. The EPLAN Platform can be deployed for use in new or existing electric engineering project models from the EPLAN software and tailor made for your specific needs. The EPLAN Platform is sold as a stand-alone solution. EPLAN platform for electric engineering with documentation feature - Task-, process-oriented, and transparent documentation of electric engineering processes based on Siemens EPLAN ECAD software The EPLAN Platform serves as a powerful and comprehensive database for electricity and building management. It is not simply a management tool, but an integrated, end-to-end solution. It provides EPLAN Technology development tools, the building plan, as well as the EPLAN development suite for further projects. The EPLAN Platform also directly integrates the concept of DOCUMENTATION. With the EPLAN Platform, the Siemens Building Management Solution provides the complete solution for planning and management of electrical engineering. As such, the EPLAN Platform takes into account all the relevant technology solutions. In this respect, the EPLAN Platform encompasses the EDC, MOC, PDTC, EPLAN, and CAD functions, which are seamlessly integrated with one another.
