the way he decided to write the book is very interesting. on the way to the writing of this book, he decided to write about a lot of things that he had done in his life, and it turned out that most of the things he wrote about were about his own personal struggles, things that nobody knew about. this book has gotten a lot of attention, and i think it is because of the fact that eminem is a very deep person. this book is really for anyone who is reading it, and it shows that there is always someone there for you. it is not only for those who are struggling with life, but for people who are struggling with love or problems. the artists that he has

listened to have influenced him. he has listened to tupac, he has listened to jay-z, he has listened to eminem and he has listened to a lot of other people that have influenced him. he has been inspired by a lot of different people over the years, and he has learned a lot from them. the reason why he wrote the book is because he wanted to share his experiences with others, to help other people with the problems that they are facing. he is a very sensitive person and he felt the need to share his experiences with people in order to help them as well. the images have always been a huge part of me and my work. i always thought i was the best photographer in my class at school, but a picture of myself in the nude was rejected because my teacher thought it was too sexy. i ended up doing a double degree and writing a book about the experience, because i knew i was one of the few people who could do it.
