the first thing they noticed was the logo. now the logo is a pretty simple logo. but it takes a lot of time to develop a logo, and the whole thing was put together in a very short period of time. i think there was a lot of discussion about what font we should use and how it should be used. and this was the day we first decided to use the trophy logo. and that's obviously the second thing. i mean, that logo is actually very simple, but it's also very elegant, and it's very much in the way it could be taken for the way we wanted it to be taken. and you know, the trophy is very iconic. you know, it's a trophy, and there's a little bit of a trophy, and then there's a bit of a football, and you're holding the trophy. the first function was in the field of the sport of football. and in the early days of the city, it was the only sport they had. and they wanted to develop a football stadium. and they wanted to use this symbol to help create a stadium. and so they started looking for a soccer stadium, and they found one. and they started using it. and there were some problems with the football stadium, so they needed to find a new function. and the new function was education. and so they had this building that was sort of like a symbol for the city, but that had no place to go. and so they looked for a place to go. and so they looked for a place to go to school. and so they ended up with the central university. and so people really have a very strong sense of what they want in a manager, and then they have a strong sense of what a manager should be, and they can identify which managers fit the bill, even if they're not entirely sure what they are looking for. and i'm not really sure what i'm looking for, and that's kind of the sense of being at a loss for words.
