```

"Project.IGI.1 ---->steve 1 Serial Key" I need to output the string to use it with a ListView. How can I do that? Thanks a lot. A: There are several ways to get the string you want from the document, but let's use this one here since it's a simpler and easier approach (see comments):

```
var doc =
JsonDocument.Parse(json); var serial =
doc.Get("serial").Get(0).Get("title"); var
post = doc.Get("w").Get("posts").Get(0
).Get("title"); var view = doc.Get("w").
Get("views").Get(0).Get("title"); [The

book world, it's now time to talk about the concept of the Serial Collector. The idea here is that you get yourself a device that plugs into your computer's serial port, which allows you to take book acquisitions out of your local, campus or institutional library, onto the web.
