As promised, here's the second demo of some of the Revit Extensions that have been recently added to the Autodesk Subscription Center. The Revit Extensions package includes the following:Column/Beam Reinforcements: Aligns reinforcement members automatically as beams and columns. This extension enhances the ability of the Reinforcement and Fabrication tools in Building Information Modeling (BIM) environments to accommodate beam and column reinforcements.Content Generator: Creates new content by combining geometry and geometry attributes from one or more models into a single content object.Digital Mockup: Allows design teams and site surveyors to build digital drawings for their projects.Dynamic Line: Line Extensions that automatically adjust to curves and corners (when overlapped with other elements) and can be labeled and annotated. This extension is no longer in the Autodesk Subscription Center. Autodesk strongly recommends the new "Dynamic Text" extensions.Integration with Autodesk Robot Structural Analysis 2012: Confirms and confirms details for Autodesk Robot Structural Analysis 2012.Ribbon Integration: Allows users to define and use custom ribbon windows and toolbars in Autodesk Revit Structure 2012 and Autodesk Revit Structure 2012 mobile.Revit Extension : Allows users to check the integrity of custom automation within Revit from Revit Structure 2012 and Autodesk Revit Structure 2012 mobile. In Autodesk Revit Structure 2012, this extension is called the Integrity Check and in Autodesk Revit Structure 2012 mobile, this extension is called the Integrity Checker. The Autodesk Subscription Center contains this extension, and it is also available as an individual purchase fromhttp://www.autodesk.com/store/Extensions?id=13559

In case you missed it, were releasing v2.0 of our Revit 2014 Guide today (7/3/14). Check out the new tutorial videos at www.Autodesk.com/Revit. After the success of our 2014 guide, we are continuing to expand our Revit product line. Weve added many new features and continue to collect feedback to make Revit 2014 a better product. In a perfect world, if youre a freelancer or a small company,

you have a team that takes care of all the technical stuff. For everything else, you can use the best programs and a lot of time is saved. Enter Autodesk Revit. If you want to document the design process or the building itself, you need to be able to save your ideas as an Revit file. The program is easy to use and can handle all your design needs in a unified, geometric way. In our case, we want to share all our files with each other, with our partner or without. Autodesk, Inc., is a world leader in 3D design, engineering, and entertainment software. Since its introduction of AutoCAD software in 1980, Autodesk has developed the broadest portfolio of software used by designers, engineers, and artists. NetVista is a collection of network-based software applications created for, and integrated into, AutoCAD. It includes Revit Architecture, a 3D architectural-design application; NavisworksTM, a 3D MEP (mechanical, electrical, plumbing) and small-block BIM (Building Information Modeling) integrated modeling solution; Elements, a visual authoring tool for 2D and 3D drawings; and AutoCAD Architecture, a Web-based collaborative 2D drawing application. From concept to completion, Autodesk provides the integrated applications, digital media, and Web-based tools that architects need for winning projects. Headquartered in San Rafael, California, Autodesk had 2015 revenues of $2.2 billion. For more information, visit http://academy.autodesk.com . 5ec8ef588b
