I have a simple Employee and Department model, the Employee has a Department property, and I'm using the MembershipAspNetRolesProvider (for security purposes). The Employee/Department model looks like: public class Employee { public int Id { get; set; } public string FullName { get; set; } public string FirstName { get; set; } public string LastName { get; set; } public Department Department { get; set; } } public class Department { public int Id { get; set; } public string Name { get; set; } public ICollection Employees { get; set; } } When I use a list view to display a list of Employees: List of Employees No employees have been entered.
