What's New In Login Helper?

The program is very easy to use. To check the state of the Auto Login feature, click the Check button. To change it, you can click the Change button. You can also lock the computer if the auto lock feature is activated, if the computer is idle for a pre-set period of time, or if the computer is in a certain state. You can also control the settings from within the program. Note: The Auto Lock feature only locks the computer if you have set the timeout period. It is not possible to lock the computer if you click the Check button while it is set to 'Lock after idle time'. Each time you start the Auto Login Helper, it will check the current state of the Auto Login feature. If there is a change, it will warn you. If there is an error, you will be presented with a dialog box. Uninstall: When you uninstall the program, all settings will be removed. For a permanent uninstall, you must remove the program files. From Start -> Run (or Start -> Type Run) -> Type "regedit" -> Click OK Click on the "AutoLogin" key in the left-hand pane and locate the "AutoLogin" value in the right-hand pane. Double-click on the "AutoLogin" value. Right-click on the "Hide" entry and select "Modify". On the "Hide" entry, add a 0. Click OK twice. Note: Changing the value to "0" will completely turn off the Auto Login feature. Unable to run the program: Make sure the "Run only when you open a program or click a file" setting is disabled in the file's properties. Right-click the AutoLogin.exe file and select "Open file location". In the folder that appears, right-click the setup.exe file and select "Open file location". Make sure that the AutoLogin.exe file and the setup.exe file are located in the same folder. If not, move the files to the same folder. If you do not find the files, create the following directory: C:\Program Files (x86)\AutoLogin\ and place the files there. Close all programs that you have open and then restart the computer. If you are unable to run the program, try running it from the same folder as the AutoLogin.exe file. This will allow the program to find the files. Error message: Unable to register the.Net Framework. Please ensure that the following registry key is present: HKEY_LOCAL_MACHINE\Software\Microsoft\NET Framework Setup\NDP\v4\{version}\AllowNU
