## New York Skyline

Short description: This theme is designed to use the classic wallpaper image of the New York skyline at twilight. The image is lightened and darkened with the help of three bright colors. Three transparent colors help to integrate the main theme background and the desktop panel. The wallpaper image is showcased in a nice fullscreen mode. The theme is really well thought of, with a nice depth and color. The transparency is great, as well. The .msstyles file is included in the zipped theme archive. To uninstall the theme: 1. Close all programs and then go to start menu. 2. Select All programs and apps. 3. In there find your Theme, select the Wallpaper and click uninstall. I would recommend this theme to all. Thank you for this Wallpaper. I am waiting for others too. Make a fullscreen window with the image on one side and a transparent black background on the other side for the wallpaper. Drag and drop the theme to the desktop. It works like a charm, thanks. Well, I did some upgrades and tweaks and discovered that this theme works better in Win7 Ultimate than it did in Win7 Home Premium. My upgrade to Win7 Ultimate does not have Wallpaper installed, so I had to download it. I am going to edit this post to make the changes that were made for Win7 Ultimate. Updates: New to the theme: Added a Transparent black wallpaper Added additional Control Panel Panel Icons and Button Icons Added Large and Small Wallpapers Better for Win7 Ultimate: Created a Fullscreen, black background, on the left side of the wallpaper, so that the image can be viewed with a black background. The wallpaper works with a solid black background, but looks bad. Added an option in the Theme Control Panel for the fullscreen black wallpaper. Big changes: Went back to the wallpaper image I originally designed for this theme. The image still looks fine. I made this theme to complement an image of the New York skyline at sunset. The wallpaper image still looks fine with this theme. Making a solid black background, as I said before, just looks wrong. The image is a nicely lightened image, and the black is totally out of place. Thanks for your comments and the many suggestions. Hopefully, I will be able to add more updates to this theme, and make other changes. I
