Phillies' struggles on the mound

continue. Anibal Sanchez pitched

very well against them last week,

and they haven't been good since.

The Phillies haven't found a way to

win, which has been the storyline leading up to this game. It's been nearly a month since they've scored a run in regulation. They haven't won a game since April 17, and it looks like it will be a couple more weeks before they reach the .500 mark. Here's what the Blue Jays have to say about the Phillies and the team's struggles. • Drew Hutchison threw seven

scoreless innings in the second game of the series on Tuesday. If he can do that again, maybe the Jays can take a series. • Darwin Barney has shown a lot of promise in his first nine games with the Blue Jays, but he hasn't had a quality at-bat in almost a month. He's really the only guy in the Jays lineup who has had trouble getting on base. • Despite a .328 average,

Travis Snider hasn't been hitting much lately. With Daniel Norris coming off the disabled list today, there's a chance we'll see Snider return to the lineup. • As mentioned before, the Phillies have struggled on offense of late. The Phillies have the worst OPS in the majors over the past 30 days. Homogeneous multiplexed capillary electrophoresis of

biomolecules with in-line laser-induced fluorescence detection for high-throughput single nucleotide polymorphism genotyping. A capillary electrophoresis (CE) method was developed to characterize single nucleotide polymorphisms (SNPs) in a DNA sample with multiplexed detection of the electrophoretically separated components. The assay

combines CE with the use of a
pico-Luminescent tag (PLT) and in-
