JavaRegistrer will guide you step by step through the process of installing Javaee. How to install Javaee: Download JavaRegistrer from the JavaEE. Run JavaRegistrer, select your installation type, that may be Help-S- Programs-S- Internet-S- Open JRE-S- Registry-S- Select your language, that is english. Select Ok- After the installation is complete, run the tool again, select your installation type, that may be Help-S- Programs-S- Internet-S- Open JRE-S- Registry-S- Select Ok- The final step will be to open the Registry-S- Manage the details in this list (click for details) The JVM Registry is populated in the last column (JVM_Registerer) with an **active** tag JavaRegistrer will pop up

a window telling you that the update is complete. Well, I tried it on my PC, and it worked!The target system is a WinXP with I think java 1.6u10 and so it isn't the most recent java release for winxp but I thought it was good to do a small test before I am going to update my lab server. The result is really good. As I said, it is very easy to use, there are only a few options to manage and when everything is OK (after the update) then you will see in the Registry-S- the JVM_Registerer changed from **inactive** to **active**. Well, I tried it on my PC, and it worked!The target system is a WinXP with I think java 1.6u10 and so it isn't the most recent java release for winxp but I thought it was good to do a small test before I am going to update my lab server. The

result is really good. As I said, it is very easy to use, there are only a few options to manage and when everything is OK (after the update) then you will see in the Registry-S- the JVM_Registerer changed from **inactive** to **active**. I do not know whether you have this problem, but in my case the windows firewall must be turned off and windows must be opened.I think it may be necessary to configure the Windows Firewall, especially if you have Windows XP Professional version. Thank you for your reply. I just completed the update of the lab server using JRegistrer and it did not detect that Java1.6u10 was installed. Java1.6u7 was detected and 1.6u7 was

System Requirements:
