A spreadsheet is a great tool for creating and organizing data, but maintaining these spreadsheets with repeated entries can be a nightmare. It's easy to see how the task of verifying spreadsheet entries before editing or building a spreadsheet becomes a time-consuming task that loses your valuable time. With Methis Data.mill for Excel, you can easily clean your Excel spreadsheets of misspells, duplicates, errors and other anomalies by enabling you to quickly and easily see what the actual data is. Methis Data.mill for Excel Features: Create and clean your spreadsheets easily Quickly find, edit and clean any kind of duplicate entries in your spreadsheets Search for errors, misspells and more Use conditional formatting to easily identify and highlight cells that contain a specific value Track your spreadsheets over time Collapse your spreadsheet to show a dedicated panel for each customer, client or company Separate your customers or companies based on category and year Categorize your customers based on company size, etc You can add and edit variables that relate to your company Extract specific chunks of data from spreadsheets Convert different types of data in your spreadsheets into new formats Support for more than 80 languages Supports the use of formulas, conditional formatting, smart highlighting and more Requirements Microsoft Excel 2007 or higher Download Methis Data.mill for Excel Excel users are strongly recommended to download the tool via the Microsoft Add-In Manager, instead of the Excel shortcut file that is often available in the download section of the website. A disadvantage of using the shortcut is that you might be asked to restart Excel every time that you run the app. In addition, if you happen to have multiple spreadsheets running in the same instance of Excel, then you will not be able to see the list of stored spreadsheets. Download the file for Microsoft Excel using this link. Once downloaded, run the file. This process will also make available an icon on your Excel taskbar, if you have multiple spreadsheets running. If you do not see the icon, then select File > Options > Addins > Add-ins. You will then be asked to add a new entry for the 'Add-in Manager'. Click on the Browse button and navigate to the file that you have just downloaded. Once the installation is complete, start Excel and navigate to the file you have installed on your hard disk

The keystrokes of a Mac keyboard can be organized and enabled in a variety of ways. These shortcuts have become necessary for people who work on their computers. A keystroke is a set of a sequence of keys that are pressed at the same time. Some of these keystroke combinations can be extremely useful, other combinations can be awkward and take a lot of time to press. If you're a keyboard shortcuts enthusiast, then you will no doubt enjoy working with this new handy Mac utility called KEYMACRO. It is a tool that has been designed to enable you to create, save and load a list of keystrokes for macOS. These keystrokes are extremely useful if you frequently work on your computer. MacStrokes Description: If you're an experienced Mac user, then you might have come across the need to add a new shortcut to your keyboard. In that case, MacStrokes could come in handy. This software enables you to create, save and load a list of keystrokes that are used frequently on your computer. To be able to create your custom keystroke lists, you will need to install the utility on your Mac system first. UniKey Description: UniKey for macOS is a simple Mac software that is specifically designed to make sure that all your letters on your Mac keyboard are always in the best conditions. The software is capable of allowing you to get rid of a bunch of undesirable keystrokes. Therefore, you should not rely on them and make sure you're using the best ones. You might think that you would not want to do that. However, even if you're a person who uses a keyboard with a large number of keys, then it is crucial to keep all of your letters in their best condition. This is because you can easily find yourself ending up pressing unwanted keystrokes. The likelihood of doing this is quite high if you are not careful. For instance, you can accidentally press a wrong combination of letters. Another thing that can happen is that you will accidentally press a single letter instead of a combination of several ones. This software allows you to create a list of keystrokes that can be used to quickly access all the letters on your keyboard. Since they are created in such a way, they can be used a lot faster than before. To create a list of letters on your Mac system, you will first need to download and install UniKey on your Mac.
