Is there any one who is having the same issue as mine that is, . Bandicam 4.1.5.1421 Full With Medicine[BabuPC] Serial Key Bandicam 4.1.5.1421 Full With Medicine[BabuPC] Serial KeyQ: Cannot open the page in IE8 I am having a weird problem where i cannot open a webpage in IE8, ie6, ie7 etc. I have been given a website which works in everything except IE8, and I have been asked to review it. All I get is a white screen when i attempt to open the page. I tested it on my pc, on my laptop on my desktop, on my parents phone, all have the same problem, all open in all the other browsers as expected. I have checked the address bar, it is loading all the correct files, which are loaded by the index.html (it was originally a forum, although using phpbb) I have tried disabling ublock origin, but that didnt seem to affect anything. A: Some suggestions: Check the JavaScript console for errors. Check the element types too; if you are using jQuery, you can use \$.html to find out what exactly is not working. Check the document.title and document.location; maybe they were set incorrectly on this page. My second guess: you need a server-side language (e.g. PHP, ASP.NET) to handle authentication (or provide content for the HTML) and to provide basic navigation. and MSDN. When you write your own type, you know that all of the.NET types are implemented. So the compiler will pick up on any mistakes. If you want a complete beginner to your language, start at the tutorials here: Liver metabolism and the serum concentration of activated vitamin K-dependent factors in human cirrhosis. The activity of gamma-glutamyl carboxylase (GGCX), a vitamin K-dependent carboxylase, and the concentrations of endogenous and exogenous vitamin K-dependent factors in the sera of patients with chronic liver disease have been studied. The mean basal levels of the major vitamin K-dependent coag
