The crack file will unlock the full version of the software and allow you to use it for free. Then, you need to locate the installer.exe file of the software. This is the file you downloaded earlier. Once you locate this file, double-click on it to launch the installation process. On the first page of the installation process, click on the "Install" option to begin the installation process. Then, double-click on the installer program icon to launch the installation process. The installation process should be relatively straightforward.
