Once the program has been installed, you will want to make sure that the program is activated and that you are using the correct version of the software. The first step is to go to Adobe's website and search for the version of Photoshop you want to use. Once you have located the page, you can either download a demo version of Photoshop or update your existing version of Photoshop to the latest version. Once the update is complete, you will want to access the Adobe Photoshop program. Again, close the Adobe Photoshop program and open it again, and you should see the program's version number in the bottom right-hand corner. This is the version that you are using. If it does not show the correct version, you will need to activate the correct version of the software.

Lightroom 5 is the first update from the company in years. Its predecessor, Lightroom 4, was released in August 2011. Since then, the program has lost popularity, and yet it has retained its position. A TechRadar camera ratings survey revealed that Lightroom remains the most popular digital photographer's product in 2014, with people who use the software for professional use, interviewees using the software for commercial work, and weekend hobbyists. I've been going over the details of the Lightroom 5 rollout for the last few days, and it's worth time to walk you through everything. The release is not only a major upgrade of what we previously knew as Lightroom 4.0.x, it is also the version 2.0 launch for Lightroom 5. As I mentioned earlier, this software should not be considered an upgrade of the Lightroom 4 suite from a technical point of view. But over the past months, Adobe has begun treating it as such. At almost every stage of the Lightroom 5 release, Adobe is adding features consumers do not already have in its previous iterations. A new module called Panorama allows you to create photo montages. The benefit is that you can replace tedious stitching on one of the images with Panorama. This kind of thing used to be do-it-yourself kind of work, but with the release of Panorama, it's now much easier and quicker.
