There is a new serious competitor out there for Adobe. An Italian startup Graziano, despite the fact that it's based in Tel Aviv, was able to develop a product that rivals Adobe in terms of price and features, yet it's built on an as-light-weight as-cloud-based yet still power-intensive processing that makes its use suitable for a wide range of users. **Graziano** offers a rather unique photo editing and designing service that's accessible via the **Google-Play** app store, only working on android devices and generating a secure web-based document. The biggest issue with Lightroom 4.x was the lack of any frame-by-frame workflow capability. All of Lightroom 4 was a sequence of button clicks. Lightroom 5 makes the overall interface simple and comfortable to use, and it supports a lot more than just the basic actions (or "actions" — introduced in the new version) that you are used to. You can also add actions from Photoshop Inside the application, without downloading anything or opening any Photoshop files. You can use them in ways you could not in earlier versions of Lightroom. For example, you can apply a motion blur filter from a Photoshop action to your image, just like you would apply a motion blur filter to an image in another application. The amount of support for Photoshop actions is probably one of the most interesting changes in the latest version of Lightroom. Lightroom 5 also supports the Photoshop File Support plug-in and the DNG Converter plug-in. The former helps you view your images as they came from the camera, and let you edit them easily before they get converted into DNG, a format that is less processor-intensive to work with for Lightroom's purposes. The latter lets you use DNG files as a Lightroom 3 compatible format. This is pretty exciting for those of us who still have older versions of Lightroom installed, as we can continue to use our old catalogs without too much trouble. I've been using the DNG converter plug-in before I made the update, and my prior and current catalogs — both of which are more than a year old — seem to work fine.
